Q13. What is good about the course?

1. I love the atmosphere in the class and the presentations
2. Review of course content through MC questions at the beginning of lecture which facilitates our learning. Instructor is very opened to our discussion and questions.
3. Reviewed my study in micro and macro economics; very good content/materials; instructor is very helpful.
4. The professor is very qualified to teach the content and is great with feedback and guiding the students in the right direction.
5. comprehensive coverage of the topic.

Q14. What could be done to improve the course?

1. I believe it would be more relevant if we could look more into the current events as examples to help learn in the course, rather than solely looking at economic theory... However, that is what the course is supposed to teach, so I don't know if it would be appropriate spending less time on the economics.
